

How to write CD/DVD media

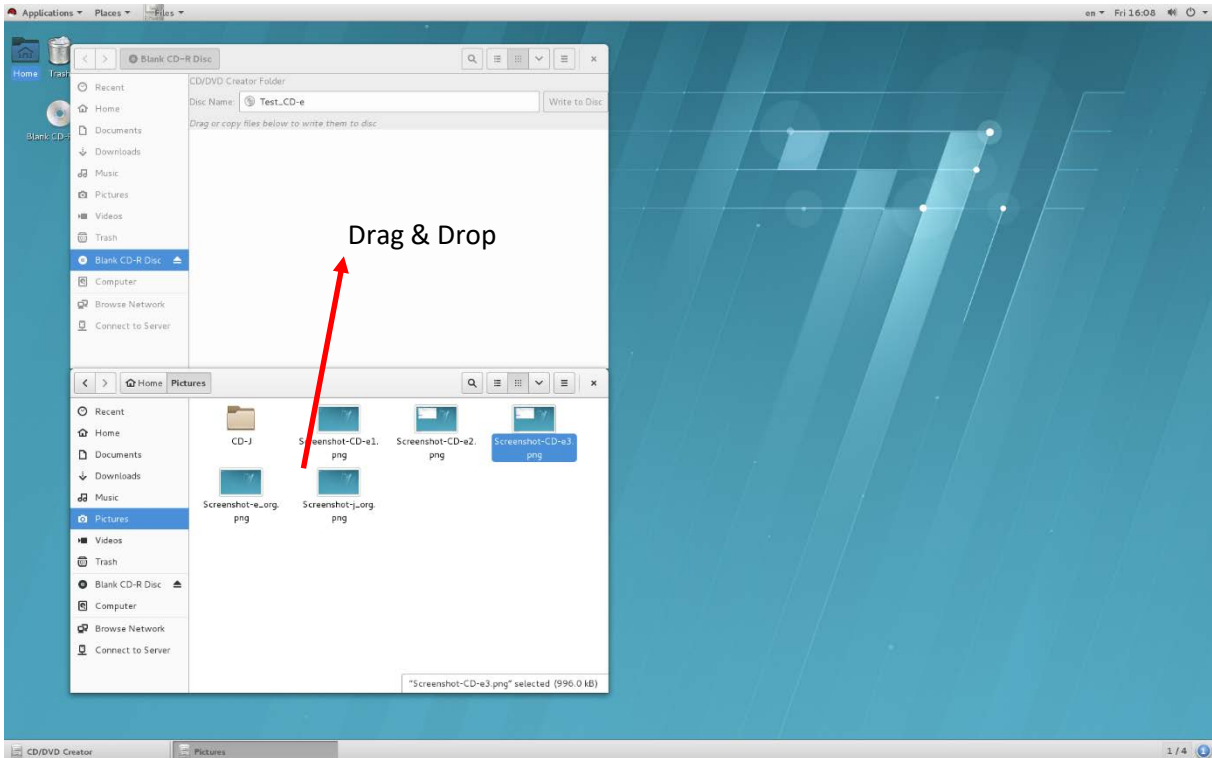

1. Insert blank CD-R/DVD-R disc and double-click “Blank CD-R/DVD-R Disc” icon displayed on the Desktop. (Starting “CD/DVD Creator”)

2. Enter “Disc Name” *NOTE: Default Disc-name includes space.

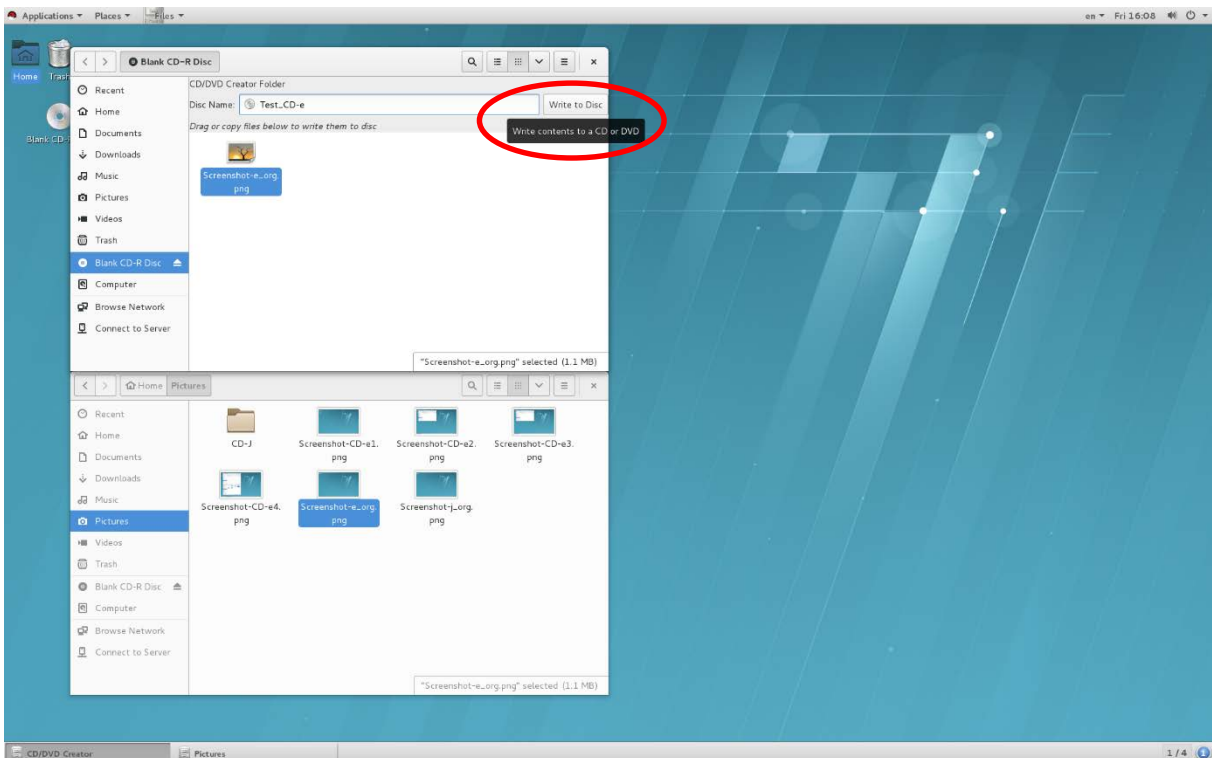

3. Drag & Drop the data (files) which you want to write on the window of “CD/DVD Creator”.

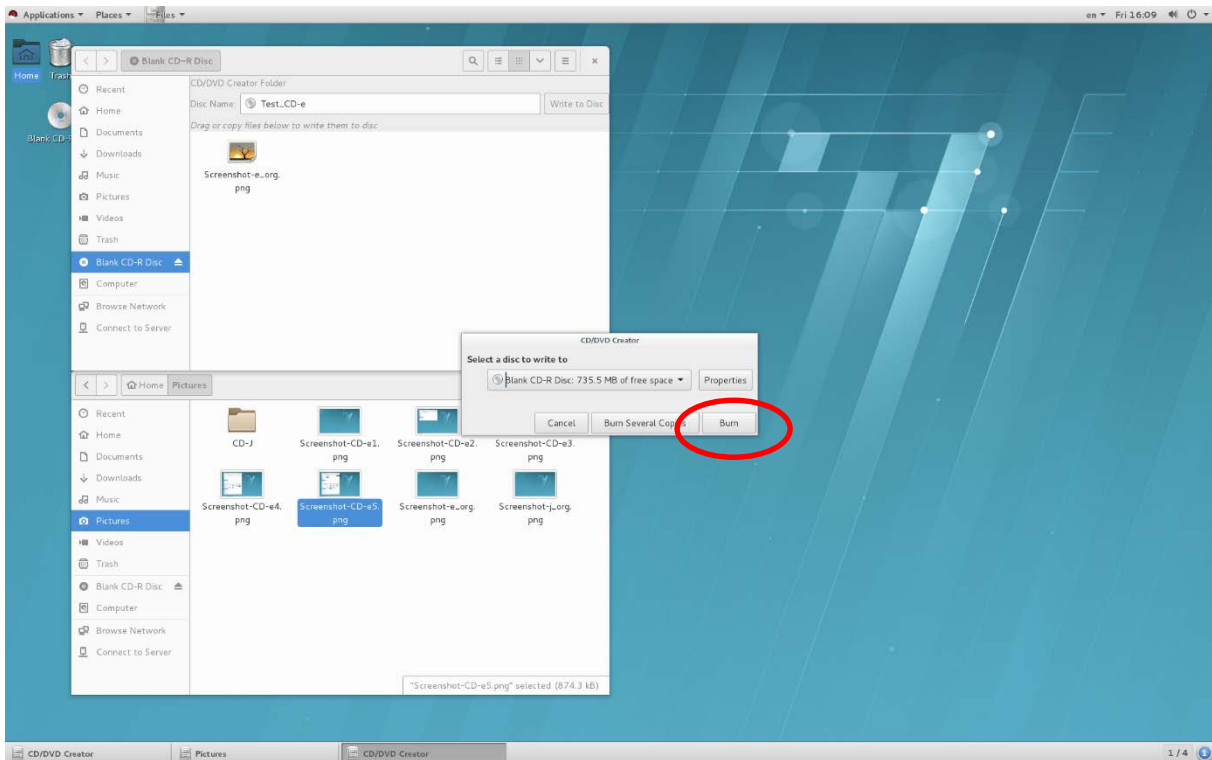

* NOTE: You can display icons of data which you want to write as follows.

- Double-click “Home” icon on the Desktop
- Contents of home-directory as icon opens, and move to the directory included target data (files).

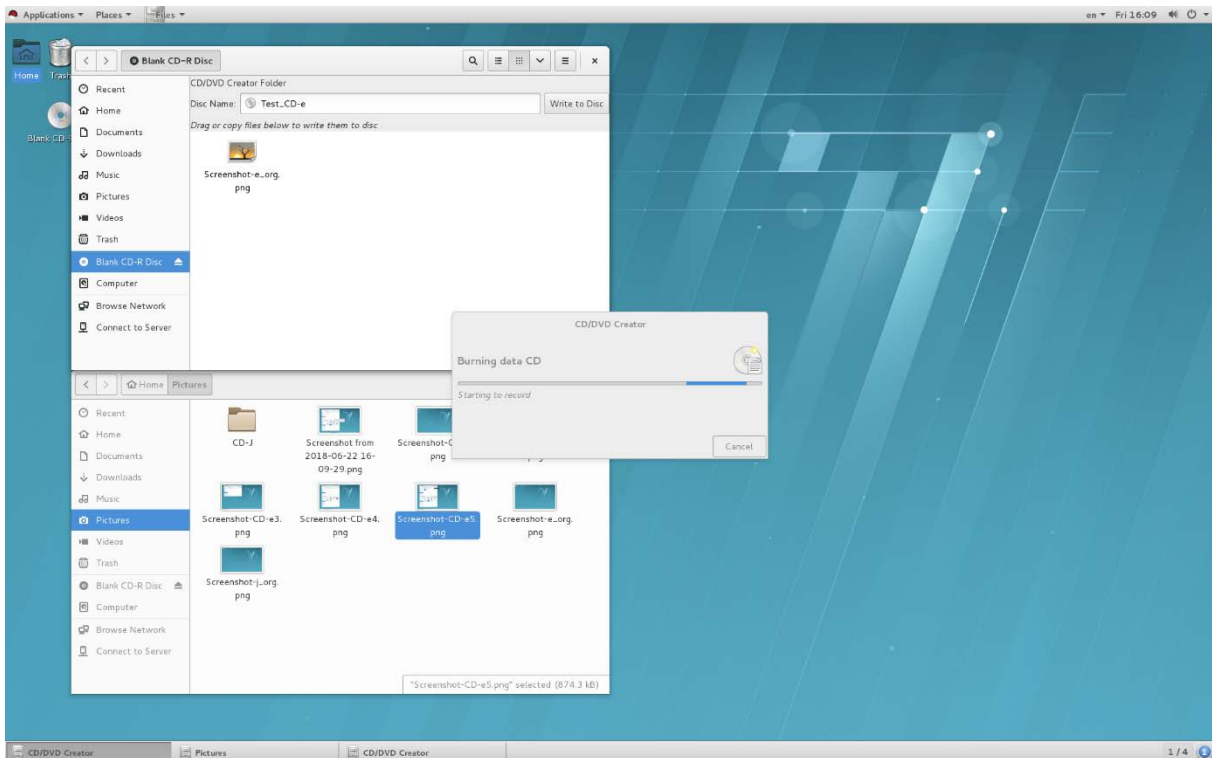

4. The [Write to Disc] button on the window of “CD/DVD Creator” changes clickable. Click the button.

5. Click the [Burn] button on the following new window.

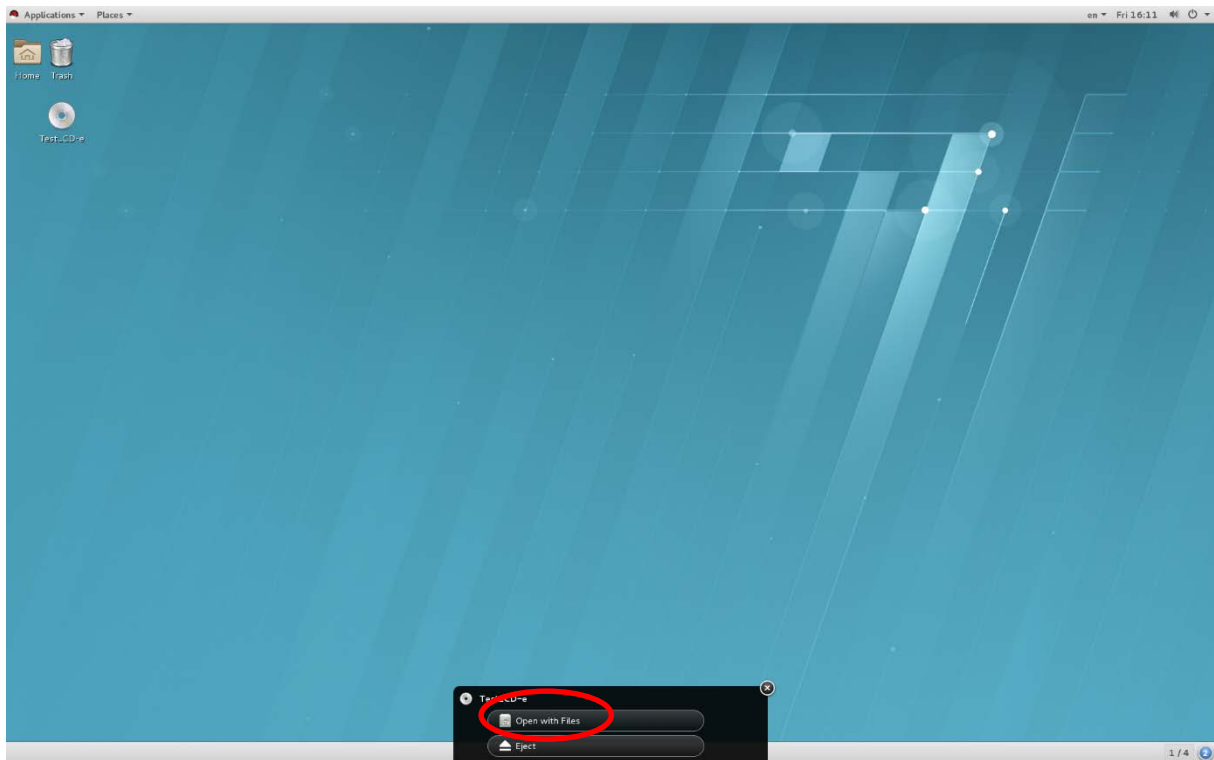

6. The window like following image opens and writing starts.

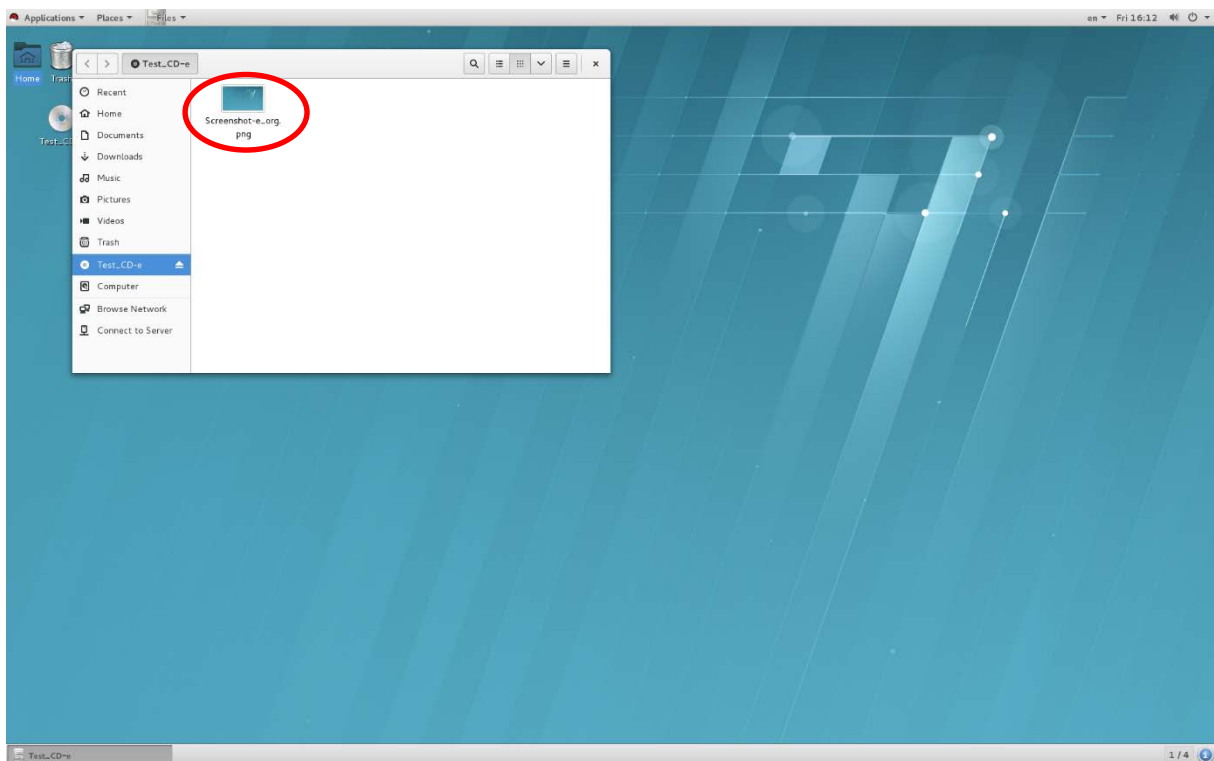

Confirmation of the recorded data

7. After data writing and re-insert the recorded disc, the following screen is displayed.
Click “Open with Files”

8. Recorded data (files) are confirmed as follows.

[NOTE]

- "CD/DVD Creator" can not add data to the recorded disc with free space (once-write only).
- The finalization and the checksum could take some time.
